Plug-In

Initialization

For each parameter

`AAX_IEffectParameters::GetParameterDefaultNormalizedValue()`

value

`AAX_IEffectParameters::UpdateParameterNormalizedValue()``iSource: AAX_eUpdateSource_Unspecified`

(see sequence above)

Following all parameter updates

`AAX_IEffectParameters::GenerateCoefficients()`

(see sequence above)

Timestamp synchronization with real-time thread

PostPacket() processed

Update algorithm context
